

# Jewelry Care

Please keep in mind that all Samantha Lavi Artistry pieces are handmade and delicate to an extent.

*Here are some helpful tips for caring for your new jewelry.*

1. DO NOT utilize jewelry cleaner or soaps on your pieces, as it may cause your piece to tarnish or it may strip the color off of colored aluminum wire. Carefully wipe clean with a dry cloth or rag. *All earring hooks are made from sterling silver, so you may clean these pieces with a jewelry cleaner or soap.* Be mindful not to get jewelry cleaner or soap on anything other than the earring hooks.
2. Remove jewelry before bathing or swimming. Chlorine and salt water can cause damage, change of color, staining, etc.
3. Remove your jewelry before bed time.
4. Put on perfume and lotions before putting on your jewelry. Misting jewelry pieces with perfumes and body sprays can damage them over time.
5. Store jewelry in a clean, dry place to prevent them from collecting dust or tarnishing from extensive sun exposure. For necklace storage, it is recommended to store hanging up or laying flat. Avoid stacking wire jewelry pieces under or on top of other jewelry items, as this may cause your new jewelry piece to catch on something else and bend out of shape.
6. Remove bracelets before washing your hands or dishes, or even when using lotion.
7. Do not wear your jewelry piece while exercising.
8. For larger wire statement earrings, it is recommended to wear your hair up to avoid catching the earrings on your hair. If you do wear your hair down with your wire earrings, just be mindful while pulling your hair back or putting on a mask. If your wire earrings do slightly bend out of shape, you can gently push it back to its original shape. DO NOT TWIST the wire, as this may cause the wire to break.
